Re: PS01-P, VC01-P, VCPS02-P, and VCPS02-M wall controller Obsolescence Notification

To whom it may concern,

We would like to inform you that Zenitel has made the decision to discontinue the manufacturing of the ASL; PS01-P, VC01-P, VCPS02-P, and VCPS02-M wall controllers in order to refine our product offering. This decision is a direct response to the low demand for these specific products.

Please be assured that we will continue to provide repair and support services for these products to the best of our abilities.

At Zenitel, we value your business and remain dedicated to delivering the latest technology to meet your PAVA (Public Address and Voice Alarm) application requirements. We still offer other wall controller devices in our range that may be suitable for your needs. These are defined in the table below.

Our team of engineers, account managers, and representatives are available to assist you in selecting the right product for your application. If you have any questions, please don't hesitate to reach out to us today.

We appreciate your cooperation and look forward to continuing to serve your business needs.

Yours sincerely,

Henry Rawlins
Head of Product Management PAVA
BU Transportation Solutions
ZENITEL

List of equipment

Part code	Description	Recommended alternative
