

ZENINEWS

when communication is critical

IN THE SPOTLIGHT

VIDEOIQ®

Powerful. Proactive. Zero Bandwidth.

VideolQ is the leading intelligent video surveillance solution on the market. The iCVR family delivers real-time threat detection using leading video analytics while eliminating the need for external third party Network Video Recorders (NVR), Digital Video Recorders (DVR), and Video Management System (VMS) platforms. The result is proactive video surveillance, preventing incidents before they occur, and dramatically simplified deployments reducing installation and maintenance costs.

Answer Yes to Any of These Questions and VideolQ is Right for You

Theft and Vandalism

- Have you experienced theft or vandalism in the past 12 months?
- Do you employ a guard of patrol service?
- Are you worried about criminals entering your premises?

Critical Infrastructure

- Do you have onsite guards?
- Is protecting your perimeter important for you?
- Are you interested in Video Analytics?

Wireless Deployments

- Are you planning or would you like to use a wireless network to connect cameras?
- Is trenching too expensive for your site?

Automatic email notification and smart phone clip viewing

Whenever a VideolQ camera detects an event, emails can be sent directly to any email client, including smart phones and PCs

- Do you have to install a fiber optic or dedicated high capacity network for your security solution?

VideolQ is the only solution that protects like a guard at 1/5th of the cost and dramatically reduces installation time and resources for ANY deployment.

Proactive surveillance

VideolQ's adaptive analytics uniquely identify people, vehicles and boats from objects, animals and scene movement, ensuring the most accurate real-time threat detection on the market.

Intelligent Video Surveillance for any Security-Intensive Environment VideolQ customers are transforming passive video recording into dynamic, intelligence-driven systems for early warning, security protection, event detection and rapid incident investigation. VideolQ systems are installed worldwide in applications ranging from the protection of commercial businesses, public utilities, homes, high-risk homeland security facilities and educational institutions

Hang A Camera and Go: It's That Simple

VideolQ's adaptive analytics set a new standard

Adding security can start with only one camera. Even if you already have a camera system in place, by adding an iCVR camera or decoder (to your existing camera) you will drastically improve your ability to detect threats and improve security.

Please call our office for a demonstration or go to <http://www.youtube.com/user/VideolQ> to see videos of the VideolQ iCVR cameras.

SPECIAL!

This month Zenitel offers you **10% discount on all iCVR products.** (max 2 cameras per customer)

NOW AVAILABLE: intercom without expensive server

NEW SERVERLESS AUDIO COMMUNICATION SYSTEM

STENTOFON PULSE

Intercom for everyone

HD VOICE GCoIP®

NEW PRODUCT

STENTOFON Pulse is an ideal economical solution for your smaller communication requirements. The system allows for as few as two stations and is scalable according to your needs. Based on STENTOFON's IP technology, STENTOFON Pulse is a serverless system that offers exceptional voice quality and many of the features and functions of our larger AlphaCom system.

The IP based system works by letting you use your existing IP Network infrastructure. It utilizes open standards including SIP, HTTP and XML, making it simple to integrate and expand with third party systems. STENTOFON Pulse

features all STENTOFON IP Stations including our special purpose stations suitable for any environment.

Allows up to 16 stations per system - No central server equipment required - Auto discovery of IP stations - System setup using web browser in less than 10 minutes - Stations support Active Noise Cancellation - Supports all STENTOFON IP Stations - Wide range of special purpose intercom terminals - Supports open standards and IP technology - Compatible with STENTOFON AlphaCom – easy to expand and grow

CHUCHUBI - DID YOU KNOW THIS?

The new Cassidian THR9i and THR9Ex ChuChubi radios offer the unique Lifeguard feature. The new Lifeguard feature is the advanced solution for man-down functionality. Lifeguard recognizes if the radio stops moving or remains horizontal for a given period, which may mean that the user is injured or has fallen. In this case the radio triggers an automatic alarm and sends its geographical coordinates to a predefined destination, which might be other team member or the dispatcher.

A video of Lifeguard can be found at http://www.keytouch.info/features/videos_and_podcasts?
