

when communication is **critical**

IN THE SPOTLIGHT

STENTOFON PULSE

Small IP Intercom system

STENTOFON Pulse is now available in the Caribbean. STENTOFON Pulse is an ideal economical intercom solution for your smaller communication requirements. Based on STENTOFON's IP technology, STENTOFON Pulse is a serverless system that offers exceptional voice quality and many features and functions. STENTOFON Pulse features all STENTOFON IP Stations including our special purpose stations. Stentofon PULSE systems are being used in supermarkets, offices, medical facilities, garages, small hotels and apartment complexes, gas-stations, stores, etc....

Simple to integrate and expand

Based on STENTOFON's IP technology, STENTOFON Pulse offers High Definition voice quality, simple installation and ease of use. The IP based system works by utilizing an existing IP network infrastructure. It employs open standards including SIP, HTTP and XML, making it simple to integrate and expand with third party systems like PBX systems.

Reduce installation time and cost

STENTOFON Pulse provides a smart and simple interface that reduces installation time and cost. To install Pulse, one station is selected as the primary station or system master. This master station provides SIP server functions to the other stations in the system and optionally any third party IP telephones and gateways. Depending on the number of stations in the system, basic installation can be completed in less than 10 minutes.

No central server is required

After the management software is activated for the chosen master station; all that is required is configuration of directory numbers of the other stations. Since the system does not require a central server, connection of the IP stations to the network is all that is needed for system set-up.

More information can be found at www.stentofon.com/pulse

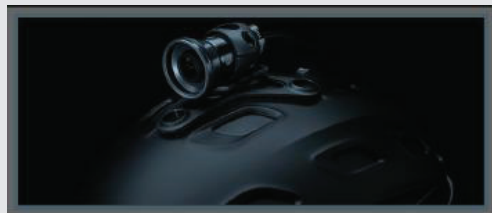

System description

- Wide range of special purpose intercom terminals
- Supports open standards and IP technology
- Compatible with STENTOFON AlphaCom – easy to expand and grow

zenitel SOLUTIONS

Zenitel Caribbean is the preferred provider of market specific solutions for the public safety authorities, security companies and related services. For years we have delivered high quality products ranging from camera-solutions for public safety, advanced vehicle lighting and audible signaling devices (www.fedsig.com) up to complete control rooms (www.kolibri-systems.com). Currently the Aruba police are testing the helmet camera to use on the streets.

My experience with the camera was great. The camera is very user friendly and light to carry. I recorded during the day time and at night; Both times the images were clear and visible. At night you can see the images clearly. You can also hear sound if you listen good. I think that this gadget can help in combating crime in Aruba. It is very useful for the bike patrol and maybe for other officers in the field. This camera system is essential for the profession. With this we can see and learn of our mistakes and improve our selves for the future. We also can use this system to record thing that we may not have seen. Overall, I had a good experience with the bike camera. Blessing,

David Leer (Korps Politie Aruba)

The most secure and reliable two way communication service available!

when **communication is critical**

Why Chuchubi Lite:

- Most affordable packages
- Two-way reliable communication
- Island wide coverage
- Unlimited talk time
- Group communication (max 10 users)

For who:

- Security companies
- Construction companies
- Transport companies
- Retail companies
- Service companies

Zenitel Caribbean is an authorized distributor of

CHUCHUBI LITE - DID YOU KNOW THIS?

Do you know where everybody in your company is at the moment? Who is available to help a customer? Or to deliver the stuff you need right now? Can you imagine you can communicate with all your personnel at the same time? For just a small fixed monthly fee and no major upfront costs? No matter where they are on the island at that moment?

This is now possible with the new affordable and reliable two way ChuChubi Lite communication package. The package offers smaller security companies, construction, transport, retail and service companies the possibility to have two-way reliable island-wide group communication. There are several packages with Motorola and Cassidian radios available. Talk time is unlimited, but groups are limited to maximum 10 users. This is the ideal communication package for smaller companies that want to avoid huge costs for mobile communication and get improved work-flow and efficiency. Contact a Zenitel representative to get more information or to get your communication package within 24 hours!*
