

ZENINEWS

when communication is **critical**

IN THE SPOTLIGHT LOCATOR

LOCATOR is the vehicle and personal tracking service from Zenitel Caribbean. Zenitel is the number one 'mission critical' telecommunications provider in the Caribbean, and has been for decades. For years Zenitel has provided vehicle tracking solutions for professional users using the ChuChubi digital radio network. Now this service has been improved for ChuChubi users and expanded to non-ChuChubi users.

Do you know where your vehicles have been and how they are used?

With LOCATOR you can check where your vehicles have been at any given point in time. You might get a complaint about a service that has not been delivered or that one of your vehicles has been speeding outside a school. If you have a policy that your vehicles should not be used during the weekend, you can use LOCATOR to verify that this policy is followed.

What is the status of your vehicle fleet right now?

LOCATOR displays your vehicles on a map with information about current position, speed and status. Important alerts and status signals from your vehicles can also be displayed in real time.

Business value

LOCATOR increases operator efficiency by visualizing fleet management tasks. The real time view makes sure that your vehicles are used according to company policy. With easily verified vehicle positions your

vehicles are used more efficiently and unnecessary driving is reduced.

Customers also report significantly better vehicle utilization and overall economy as vehicles are used more in line with corporate policies.

How does it work?

LOCATOR stores the usage history for your vehicles so that you can see the status and the position of each vehicle at any point in time. You can check the routes vehicles have taken and how fast they have driven. You can generate reports on vehicle usage on regular basis and drill into details for a specific vehicle. The system also registers how much time every vehicle spent on each address that was visited.

Other applications

LOCATOR can also be used to track persons (for example Alzheimer patients and children), boats, construction equipment, containers, personal assets and even ATM's.

Tracking devices

LOCATOR is a rugged device that can be installed, invisibly, into any vehicle. The product has numerous connections to control your vehicles. It can also be used to measure temperature, pressure, levels and more by adding suitable sensors. A Personal LOCATOR is available as well. A stand alone device, the Personal Locator has a built-in battery

LOCATOR can also be used with your GPS enabled ChuChubi radio.

and is small and inconspicuous so it can easily be carried in pockets or bags.

Caribbean coverage

Zenitel has local offices with highly trained technical specialists on Aruba, Bonaire, Sint Maarten and Curaçao.

Protect your boat using LOCATOR. Ask for the special waterproof device with emergency and antitheft protection.

STENTOFON is a powerful and flexible communications platform that serves a wide range of applications. It works straight out of the box, but if required, it can be tailored to support applications of almost unlimited specificity and complexity. STENTOFON is being used in offices, stores, banks, industry, hospitals, airports and educational institutes. For more information visit our website at <http://www.stentofon.com> or call your local Zenitel office. We are more than happy to give you a full demonstration of the Stentofon products and its functionalities.

CHUCHUBI - DID YOU KNOW THIS?

About Motorola Accessories?

At Zenitel we recognise professional radio users operating under diverse operational requirements and working conditions within a highly demanding environment. To address these requirements Zenitel offers a wide selection of robust and reliable accessories for the Motorola ChuChubi radios. This extensive portfolio of accessories allows professional users to further customise their ChuChubi radios and satisfy their individual communications needs.

Genuine Motorola accessories enhance functionality and add both comfort and value to your ChuChubi radio. They are engineered to the same exacting standards as our radios to ensure maximum performance of your complete radio solution.

For portable radio users Motorola offers a wide range of solutions covering carrying, power and charging, as well as audio accessory solutions – for any situation.

Energy & Charging Solutions

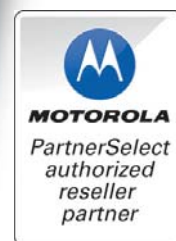

Critical communications solutions require reliable and efficient power sources and Motorola delivers this with a range of batteries and charging solutions. Our range includes desktop, multiway and in-vehicle charging solutions, coupled with the latest in rechargeable cell technology.

Audio Solutions

Motorola's range of audio accessories like earpieces, handsfree kits, low noise kits, remote speaker microphones and headsets enable users to utilise the ChuChubi services efficiently, with tailored solutions for public safety and covert users, industrial and commercial users.

Carrying solutions

Zenitel offers a large range of Motorola carrying solutions like rugged leather cases, soft carrying cases, shoulder wearing devices and special solutions, such as our innovative chest-worn carry system.

A brochure can be downloaded at www.motorola.com, or call your account manager to email you a copy.
