PARKING FACILITIES

when communication is **critical**

COMMUNICATION AND SECURITY IN PARKING FACILITIES

Both open, surface car parks and closed, multi-storey and underground parking facilities require a communication medium for operational staff and customers.

A communication system in this environment forms part of the daily activities – when the parking meter is faulty, the gate becomes jammed or parking procedures have not been correctly followed – and is essential when security incidents such as fire, assaults or collisions occur.

The Pro700 system can be used to control traffic either as a standalone system, linking the intercom to the security office, or working in conjunction with exit and entry barrier controls. When sited at customer service points, directions can be given to disabled or mother-and-baby spaces. Pro700 systems have also helped to minimize the incidences of building and car crime and even personal assaults, working in conjunction with security patrols.

To further improve security, the Pro700 system can incorporate emergency stations in the elevator and stair wells, and be integrated with conventional fixed lines or mobile telephones to provide emergency service calls.

Pro700 intercoms in parking facilities ensure improved safety and service for customers as well as efficient use of operational staff.

ORDER NUMBER	DESCRIPTION	SHIP WEIGHT
AA711	Desk/Wall Master Station	0.3 kg
AB731	Tamper Resistant Substation	1.5 kg
AB731A	Door Station	0.9 kg

PARKING FACILITIES

FUNCTIONALITY & FEATURES

- Intercom stations can be positioned at entrances, parking meters, gates, etc.
- Intercom stations in elevators, staircases and corridors can be equipped with scream alarm to be used in case of attack.
- When integrated with surveillance cameras, the intercom system becomes part of a total security system.
- Integration with conventional fixed lines or mobile telephones ensures communication when the parking facility is unmanned.

BENEFITS & ADVANTAGES

- Hands-free, loud-speaking duplex conversation with instant access
- A variety of station types designed for most intercom services and environments
- Cost efficient system without central exchange
- Simple installation and extension with four-wire cable in bus or star configuration
- Integration with surveillance cameras, public telephones and closed radio network
- Entertainment program on separate channel selectable from all master stations
- Excellent sound quality
- Easily programmable and simplified access to features
