PETROL STATIONS

when communication is **critical**

COMMUNICATION AND SECURITY AT PETROL STATIONS AND CAR WASHES

In recent times, modern filling stations have extended the services they offer to attract new business. Where once the vast majority of petrol stations were also car service stations, now only a minority are. Instead, shops have been added to the primary forecourt sales business and convenience stores are now a familiar sight. The facilities often also include customer toilets, parking area, automatic car wash, vending areas and self-serve bays for washing, water, air and vacuuming. Where the station is attached to a motorway, much larger facilities can be found: fast food outlets, arcade centers and hotels.

These facilities usually remain open 24/7 and it's only by combining an efficient internal communication system with alarm and security systems that a safe environment can be created.

With the Pro700 communication and security system, personnel and public safety is maintained by intercoms securing doors and entry gates. Cashiers can talk to customers at the pump without leaving the till unattended – superior service and security in one! One button intercom stations connected to surveillance cameras at these areas provide secure and simple access control.

Vehicle maintenance areas require weather-proof stations capable of withstanding rough, daily use. The Pro700 stations for these areas are robust and transmit messages and alarm signals for assistance both ways.

In a security incident, the cashier can press “silent alarm” using a hidden alarm button, thus warning colleagues without the perpetrator noticing and other customers becoming alarmed.

Pro700 intercoms at petrol stations provide improved security for customers and personnel, better service and efficient use of cashier and service staff.

ORDER NUMBER	DESCRIPTION	SHIP WEIGHT
AA711	Desk/Wall Master Station	0.3 kg
AA703	Industrial Master Station	0.8 kg
AA705	Heavy Industrial Master Station	1.0 kg
AB731	Tamper Resistant Substation	1.5 kg
AB731A	Door Station	0.9 kg

PETROL STATIONS

FUNCTIONALITY & FEATURES

- Intercom stations suitable for all locations:
 - Entrance doors
 - Hazardous areas
 - Garages
 - Convenience stores
 - Car wash areas
 - Cashier locations
 - Offices
 - Pumps
- Loudspeakers in common areas and areas open to the public
- Integration with surveillance cameras at entrance doors and pumps
- Hidden "silent alarm" button
- Public call and two group-call groups
- Emergency call function

BENEFITS & ADVANTAGES

- Hands-free, loud-speaking duplex conversation with instant access
- A variety of station types designed for most intercom services and environments
- Cost efficient system without central exchange
- Simple installation and extension with four-wire cable in bus or star configuration
- Integration with surveillance cameras, public telephones and closed radio network
- Entertainment program on separate channel selectable from all master stations
- Excellent sound quality
- Easily programmable and simplified access to features
