

VINGTOR PULSE SIP TRUNKING LICENSE

when communication is **critical**

FEATURES

- Connect STENTOFON Pulse to
 - Public telephone networks
 - PBXs
 - Mobile telephone network
- Easy to configure and setup

DESCRIPTION

The STENTOFON Pulse system is utilizing open standards including SIP, HTTP and XML making it simple to integrate and expand with 3rd party systems and components.

The SIP trunk license for STENTOFON Pulse allows you to connect to other telephone system using SIP trunks or analogue and mobile network gateways. The license allows you to network PBXs, public telephones as well as remote control rooms.

The SIP trunk license is added to the system master station in your Pulse installation. When a SIP trunk license is added, you will be allowed to create a SIP gateway account from the Pulse Web interface, one account for each SIP trunk license you obtained. Upto 4 SIP trunk licenses and gateway accounts can be included in one Pulse installation
