

PRODUCT SHEET

IP LINE CONNECTION MODULE

CONNECTING YOUR IP SYSTEM TO THE WORLD

The IP Line Connection Module, or IP-LCM for short, gives an efficient way to connect the world to your intelligent IP communication system.

Designed for efficient engineering, it allows for adding multiple inputs and outputs to your system powered by PoE and controlled over the network. The efficient mounting on DIN rails with robust connectors gives the option for efficient connections to external systems. This makes it useful for both locating it in a system rack or closer to the external system.

The connectors support cables up to 1,5 mm² while the IO connectors and audio connectors on the kit is also available. This gives a very versatile and robust kit.

1008095201 / IP-LCM-A

SUPPORTED IN ALL VINGTOR-STENTOFON SYSTEMS

AlphaCom systems

EXIGO systems

PULSE systems

Key qualities

- 8 high power relays
- 8 robust inputs
- Inputs support closing contacts and active power
- Robust and efficient push-in connectors
- Easy mounting on DIN rails
- Device powered over Ethernet (PoE) via the TKIS-2 module

Additional functions on the TKIS-2 module:

- 6 GPIO
- Microphone in
- Line out
- - Relay (70VA max, 5A)
