ZENITEL has firmly established itself at the intersection of two domains - communication on the one hand, security and safety on the other. As a leading player in instant audio and data communication, Zenitel's products and networks are as secure as they are fast. Zenitel is the preferred choice for situations that involve the protection of human lives, or the management of critical activities.

Zenitel is organized into two key segments, each of which has a focus on, but is not exclusively dedicated to, one of Zenitel's key principal offerings: Own Intercom Products including Third-Party Products and Network Services.

Zenitel has a strong presence in both the onshore and offshore secure communications market through our global brands, VINGTOR and STENTOFON. With our Zenitel distributor network as well as local partners, we are able to target key market segments. While VINGTOR is well established as a global leader in delivering on-board communications equipment to the marine market, an increased focus on the Oil and Gas Industry has led to a separate division within the VINGTOR brand developing solutions for both fixed and floating installations. Our STENTOFON brand is well recognized in the onshore market, focusing on Building Security such as door communication, elevators, perimeter surveillance; Infrastructure such as trains, airport and roadside communication; and Industry running the gamut from chemical plants to mining facilities.

Zenitel is a listed company (Euronext). The headquarters of Zenitel are in Brussels (statutory headquarter) and Norway (operational headquarter).
