EPIPR-6

Exigo Power Injector, Spare Pair PoE, 6 Ports

🔊 Exigo

Description

EPIPR-6 is a Power over Ethernet (PoE) midspan injector (PoE mode B spare pair), supplying up to 15.7W per port for up to 6 devices.

Used for configurations with requirement for redundant A and B systems such as Marine and Offshore PA/GA installations.

It delivers continuous power to call panels from both systems, allowing panels to operate even if power for one system goes down, or one cable link is broken.
