VIC2-4FXO

Cisco Four-Port Voice Interface Card - FXO (VIC2-4FXO)

certified to meet the requirements in NS-EN ISO 9001. Zenitel reserves the right to modify designs and alter specifications without notice.

## Description

The Cisco Foreign Exchange Office (FXO) interface is an RJ-11 connector that allows an analog connection to be directed at the public switched telephone network's (PSTN's) central office or to a station interface on a private branch exchange (PBX). The FXO sits on the switch end of the connection. It plugs directly into the line side of the switch so the switch thinks the FXO interface is a telephone.

## **Specifications**

Four-port VIC2 - FXO (Universal). Also supports CAMA with software configuration

## **Used With**

## C2911/DNV

Cisco 2911 Integrated Service Router Kit - IEC60945 Compliant
