## FM to IP gateway 8x

FM to IP Gateway 8x

---

## Description

The FM to IP Gateway 8x is a universal solution for receiving, decoding, and multicast or unicast streaming of FM radio channels. The key advantages of the FM to IP Gateway are its high density and compactness - the 1U rack-mount server can receive and decode 8 FM radio stations with 4 FM antenna inputs located at the rear panel of the appliance. It is used together with the IPTV Server 8000.
