## HB-105

Telephone Tone Caller - DISCONTINUED

---

## Description

This item is discontinued and replaced by item no. 2340200021.

- ✓ Telephone line powered (no main voltage or batteries required )
- ✓ Greatly reduced installation costs
- ✓ Penetrating 105 dBA output
- ✓ Volume control
- ✓ Maintenance-free operation

HB-105 loud tonecaller is powered by the PABX and PSTN line voltage (60-100 V AC). A variable output (85-105 dBA) is possible by means of a potentiometer located within the unit. HB-105 is a suitable additional ringer device for telephones in weather-exposed and noisy areas.
