DATASHEET

100964780X

Redundancy License

High Availability

Description

- High availability and fault tolerant solution maximizing uptime during
  - System level failures
  - Environment-level failures (power outage, fire, earthquake, etc.)
  - Planned outage for system(s) maintenance and upgrades
- Automates disaster recovery
- Easy to setup and install
- Made for Critical Communication over IP (CCoIP®)

Protect your system with Vingtor-Stentofon redundant server solution. The concept provides a 1:1 redundancy of

AlphaCom XE servers allowing you to install the servers in separate racks or server rooms. Having the AlphaCom servers in different racks or server rooms provides options for:

- Have servers in different fire zones
- Have redundant power sources
- Do maintenance in server room (patch panels, power, etc) without system downtime

In the 1:1 setup the servers are setup as a high availability pair sharing the same configuration. One of the servers is operational, while the other is in standby mode.

The solution automates disaster recovery. Change-over is fast. The total change over time depends on system-size. Normally it will take less than a minute for a full system with 552 IP-stations.

The AMC-IP card must be running software version 11.2.3.2 or higher. This software is compatible with all AMC-IP hardware versions.
