Description

Instantly connect a Mac or Windows computer to a Dante audio network with the Audinate Dante Adapter AVIO 2x2 USB Type-C I/O, a full-featured Dante device that supports 2x2 channels of 24-bit / 48 kHz bidirectional audio. This functionality makes the Dante adapter ideal for recording stereo network audio to a DAW, piping music from your music library into the Dante network, and more.
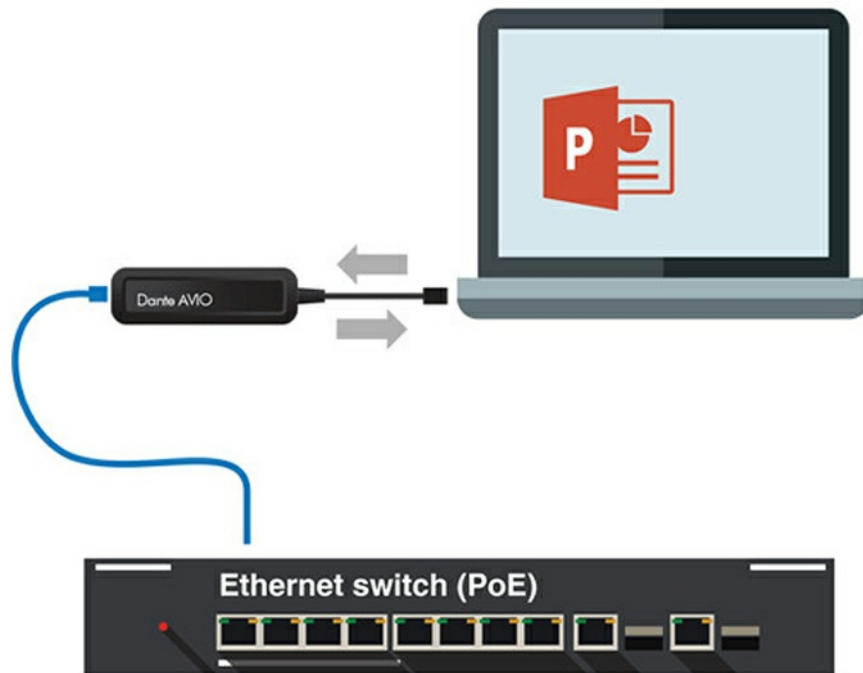

The rugged ABS enclosure features a single RJ45 port for connection to your existing PoE switch and a USB Type-C connector to allow proper hookup with your computer. Since it provides plug-and-play operation, no drivers or software configuration are required. Whether you need to record or play audio with your computer, this adapter lets you conveniently integrate it with any Dante network. Since it is powered via PoE or USB, it needs no batteries or dedicated power supply unit.

Plug-and-Play Operation

The Dante Adapter AVIO USB Type-C is a complete, high-performance Dante device, delivering all the automation and ease of use that have made Dante the most popular audio networking solution worldwide. The Dante AVIO
