Description

The EAPFX-6-V2 is the next generation in our Ex access panels. The EAPFX-6-V2 is a rugged call panel, developed for harsh offshore environments and hazardous areas. The antistatic plastic housing withstands corrosion from the most common corrosive gasses and compounds found in this type of environment. The access panel features six fully programmable buttons, which can be used to manually initiate fi re alarms, gas alarms or any other action in the Exigo system. The access panel is equipped with indicators to show the status of the power supply, call activity and whether a fault is present in the system. The access panel's buttons features two independent status indicators each, which shows the status of the related button's function. The access panel is fully digital, and connects to the Exigo system over a single-pair cable. The access panel is fully monitored to ensure detection of any fault which may compromise the system's functionality.
