Description

The NXM-IP DarkFighter Camera with stainless steel housing for aggressive environments gives our user the best of breed with high quality imaging protected inside a housing developed for extremely corrosive environments, and such a perfect fit for the Maritime and Offshore Energy environments, be it a vessel, oil&gas installation, offshore wind or other installations where the use of durable and type approved equipment is essential.

NXM 36 Housing:

The NXM36 housing has been developed for installations in highly corrosive areas such as industrial chemical, petrochemical, marine, naval and offshore platforms; entirely made from electropolished and passivated AISI 316L stainless steel for maximum protection against deterioration.

The NXM36 product is Lloyd's Register Type Approval System Test Specification Number 1 certified and therefore can be used in Marine and Offshore applications for environmental categories ENV1, ENV2, ENV3 and ENV5 (eg. passenger ships, open-air decks, closed spaces and technical areas that may be subject to heat generated by other equipment, docking procedures).

Housing's heater is supporting PoE+ (13W) or Hi-PoE (25W), PoE+ heater up to -20degC

DarkFighter Camera:

2MP Darkfighter Box Network Camera with high quality imaging with 2 MP resolution. The camera has excellent low-light performance via DarkFighter technology. Clear imaging against strong back light due to LightFighter technology and efficient H.265+ compression technology to save bandwidth and storage.

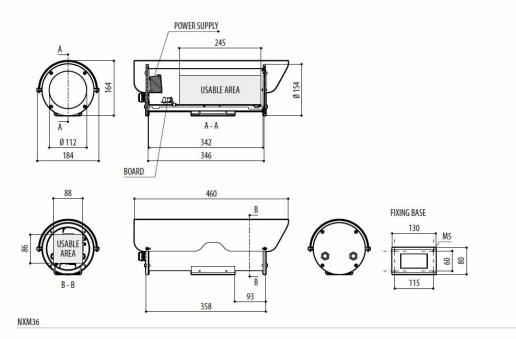

Advanced streaming technology enables smooth live view and data self-correction in poor networks, it offers 5 streams and up to 5 custom streams to meet a wide variety of applications. The embedded open platform allows third party applications to be installed in manufacturers network cameras. The camera also comes with 6 behavior analyses, 3 exception detection, and face detection.
