Description

The INTEGRA-00 all-in-one network enabled voice alarm solution has no amplifier channels pre-installed, this allows for complete amplifier channel customization.

The unit has 12 audio inputs and internal storage for up to 64 recorded messages. With a maximum power of 2000W, integrated audio-over-IP networking, powerful audio processing, and integrated battery charger and battery mounting shelf all in a compact wallmount enclosure, INTEGRA provides a complete voice alarm solution for both medium to large centralised and decentralised PAVA systems.

Up to 32 INTEGRA can be linked by IP to enable broadcasts from any location to any combination of zones in large decentralised systems. The network switch (NETWORK-SWITCH-LP01) forms a voice alarm compliant ring network topology and can be easily mounted inside the enclosure. Any INTEGRA variant and the rack mount equivalent VIPEDIA range interoperate seamlessly.
