EN 54 Certified

Description

The SPRS-S-06W-65-EN54 is a 6W 100V surface mount loudspeaker which has a 6.5" (165mm) full-range chassis providing excellent sound quality with speech and background music, and which is certified to EN54-24. The speaker is fitted with a 100V transformer which has three power adjustment tapings of 6W, 3W and 1.5W.

The SPRS-S-06W-65-EN54 has a rectangular powder coated RAL 9010 metal chassis and grille, with the high quality powder coated finish giving good long-term protection and resistance to corrosion. The enclosure is ingress protection rated to IP21 and is coloured to match RAL9010 'Pure White'.

Surface mounting to a wall or ceiling is simply provided through the use of fixing screws, with the enclosure front attaching to the rear mounting panel with three screws. The 100 V loudspeaker line is connected via a two-pin ceramic terminal block. For additional reliability, a thermal fuse is provided, and the speaker chassis features a vibration-damping, moisture-resistant design. It is also compliant with the British Standard BS 5839, Part 8.

The loudspeaker is optionally available with a DC blocking capacitor fitted, in order to provide compatibility with DC loudspeaker line monitoring systems. The part number for this DC monitoring compatible version is SPRS-S-06W-65-EN54-DC.

Enhanced Acoustic Simulator for Engineers (EASE) data is available for this speaker on request.
