SW License KWS400, 12 Handsets

Software licence for the KWS400 IP DECT system, listed for use with up to 12 handsets.

- Software licence associated with the KWS400 IP DECT system
- Listed for a 12-handset configuration
- Previously included in the IP DECT 400 Server 1G9 package
- Separate item from the IP DECT server hardware

Description

KWS400 Software Licence for up to 12 Handsets

The SW License KWS400, 12 Handsets is a software licence associated with the Zenitel KWS400 IP DECT system. It is listed separately from the IP DECT server and base station hardware to support separate product ordering.

The previous IP DECT 400 Server 1G9 package, item 2211010201, included the IP DECT Server KWS400, item 2211020151, and a Software Assurance License for one year, item 2211020135.

The licence is intended for the KWS400 system configuration indicated by its product name. The exact licence entitlement, duration, activation process and renewal conditions should be confirmed against the applicable licensing documentation before publication.

The KWS400 system is integrated with compatible Zenitel ACM systems. Each DECT phone also requires a SIP user licence in the ACM system, as stated in the existing product documentation. The SIP user licence requirement should not be confused with the separate KWS400 software licence.
