IP DECT Server KWS6500

19-inch rack-mount IP-DECT server with 110–240 V AC power supply

- 19-inch, 1U rack-mount design
- Supports IP-DECT wireless communication
- SIP interface for integration with a compatible call-handling system
- Supports multi-cell DECT deployments with compatible IP-DECT base stations
- 110–240 V AC power supply

Description

IP DECT Server KWS6500 for wireless communication

The IP DECT Server KWS6500 provides the central server for a multi-cell DECT wireless communication system. It manages connected IP-DECT base stations and the IP interface to the call-handling system, enabling wireless communication across a network of base stations.

The server uses a SIP interface to communicate with the call-handling system. Compatible IP-DECT base stations are required to provide radio coverage, as the server does not contain an integrated radio unit.

Designed for installation in a 19-inch equipment rack, the KWS6500 has a compact 1U form factor and supports deployment in suitable network environments.
