DESCRIPTION

- Accuracy +/- 0.1 sec./24 hours
- Wide range of different slave clocks (digital, 65, Ex-proof.)
- Easy cabling and calibration
- Accessories and options like radio- or satellite
  Signal receivers, RS232C/RS485 interface
- Alarm outputs, etc.
- Automatic summer- winter time change-over
- LAN connection (70000L)

Marine Master Clock is the ideal solution for distribution of both Local and UTC time on board ships.

The Master Clock is equipped with several outputs and inputs for control of Slave Clocks as well as distribution of time to computers and other equipment needing correct time. The four Slave Clock outputs can be individually programmed for different types of clocks. External radio receivers / time synchronisation sources can be connected when higher accuracy is needed.

For control and regulation of various energy consumers such as electrical striking plates, buzzers for pause signalling. The master Clock has a built in yearly programmer with two relay outputs.

The Master Clock is equipped with 10 buttons and a 2 x 16 character LCD. To facilitate the change of time zone two of the buttons are dedicated for this purpose. A light dimmer makes it possible to adjust the background-illumination to the surrounding light level.
**SPECIFICATIONS**

**GENERAL**
- **Crystal frequency**: T4,915200 MHz
- **Accuracy**: 0,1 sek./24 hours (+20°C)
- **Microprocessor**: HD6412394
- **Time memory**: 30 days (Back-up with Super Capacitor)
- **Impulse memory**: 72 hours
- **Ambient temperature**: 0° C to +50°C
- **Relative humidity**: Max. 85% non-condensing
- **Case**: 19” case according to drawing 084477-00, material aluminium. H=3U
- **IP class**: IP-20
- **Weight**: 5.6 kg
- **CE-approval, EMC**: Emission according to EN61000-6-3, Immunity according to EN61000-6-2
- **Supply voltage**: 90-264VAC 50/60Hz (Standard) / 24V DC

**TECHNICAL DIMENSIONS**
