## Vingtor-Stentofon Operator

Enhanced License

---

### Control Room Solutions

---

**Vingtor-Stentofon Operator** is a PC-based system management package for the AlphaCom audio server.

Read more about [the product](#).

### DESCRIPTION

**Vingtor-Stentofon Operator** is a PC-based system management package for the AlphaCom audio server and provides access to all of the features inside the AlphaCom. It is primarily intended for use in a control room environment.

**Vingtor-Stentofon Operator** is made to be flexible as well as easy to set up. Its default functionality makes certain that you can be up and running within minutes after installation, while its configuration capabilities will allow you to make it work the way you want.

**Vingtor-Stentofon Operator** consists of 2 software packages: Vingtor-Stentofon Operator Server and Vingtor-Stentofon Operator Client.

**Vingtor-Stentofon Operator** is licensed by the number of clients that can be connected to the server. The full functionality license allows a very comprehensive and flexible screen layout, while the limited functionality license puts some limitation on the way the screen can be laid out and only allows information to be displayed on 1 of the monitors connected to a Vingtor-Stentofon Operator client PC.

# SPECIFICATIONS

## MINIMUM REQUIREMENTS
