zenitel
because communication is critical

Zenitel integrates with Acre Security ACTpro
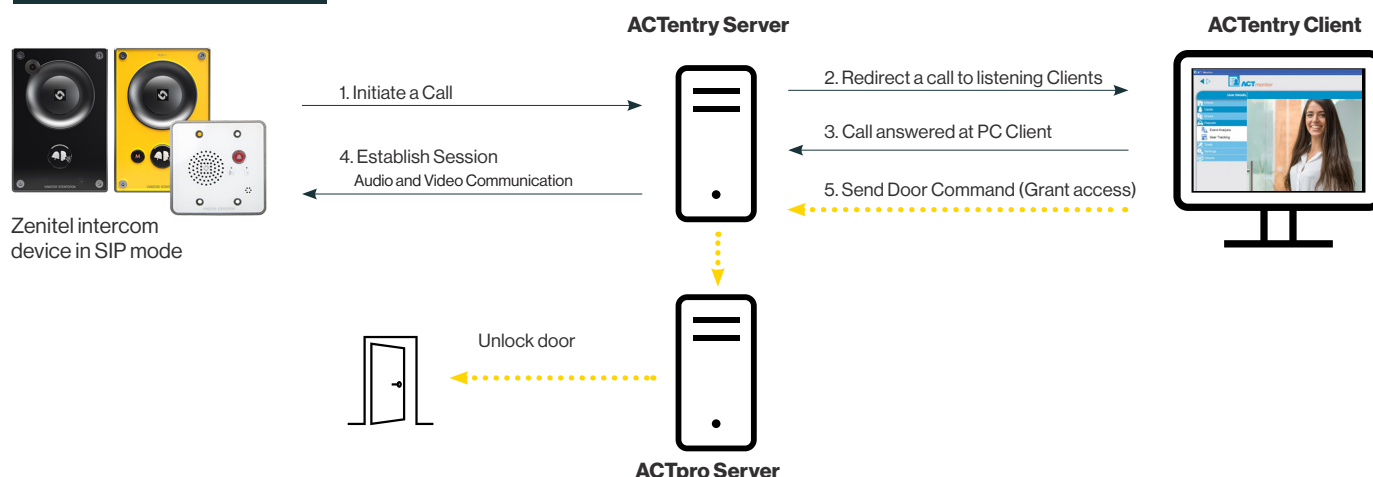

A Door Entry Solution with 2-Way Audio

Operating efficiently worldwide, Acre Security delivers exceptional security and transmission solutions that provide peace of mind across a broad variety of customer application needs, including banking, education, healthcare, and retail.

The Acre Security ACTentry Door Entry Solution offers a convenient and cost-effective way to connect Zenitel intercom devices with access control doors, providing an operator with quick visual and audio recognition of visitors on their computer.

- **Convenient and efficient communication**
  Operators answer incoming calls, get quick visual and audio recognition of visitors, and grant or deny access, on their monitors.

- **Cost Efficient**
  ACTentry combined with Zenitel intercom devices offers a cost-effective alternative to installing physical internal entry phones. The intercom calls are simply handled by the operator on their monitor and station without the need for additional hardware.

Reshaping Security

The solution

ACTentry Server

ACTentry Client

1. Initiate a Call

2. Redirect a call to listening Clients

3. Call answered at PC Client

4. Establish Session
Audio and Video Communication

5. Send Door Command (Grant access)

Zenitel intercom
device in SIP mode

Unlock door

ACTpro Server

The Zenitel intercom devices are connected to an ACTentry server, which enables the association with access control doors and the communication to and from the operators using the ACTentry client. To perform door actions and grant access, ACTentry communicates with the ACTpro access control software, enabling operators to:

- ✓ Answer incoming calls via PC to see and speak with visitors
- ✓ Monitor status and activity at intercom devices (Surveillance mode) live and in the ACTpro log files
- ✓ Monitor access door status (Normal, Unlocked, Open, Closed)

Easy set-up and use

Zenitel intercom stations are connected to ACTPro using SIP. The configuration on the Zenitel device is simple (add the IP address to dial), and devices are then added into ACTPro with a few steps. Devices are associated with doors, which enables call control and door release.

Convient and cost-effective door entry solution

The intercom is simply associated with an access control door, and provides the operator with quick visual and audio recognition of the visitor on their monitor.

Streamlined operator experience

The video and audio confirmation of visitors allows the operator to visually and audibly confirm the identity of the visitor before granting access to the facility. Additionally, the system includes a security mode where the operator can activate a live channel to the intercom and report all activities and intercom status in the ACTpro software.

Why **Zenitel?**

Zenitel is well positioned to drive the future of intelligent critical-communication solutions. Through our portfolio of IP products & solutions, with built-in intelligence and a focus on cybersecurity, we provide organizations with superior, scalable security and flexibility. Zenitel is the proven, preferred choice for environments requiring crystal-clear audio to ensure the protection of human life, property, assets and the management of critical activities. With interoperability at all levels, we seamlessly integrate with access control, video management and security platforms.
