

- 30W 100V Loudspeaker
- Size 6.5" (165mm)
- Shock-resistant ABS Housing
- Ingress Protected to IP21C
- High Efficiency
- Bass Reflex
- Excellent Sound Quality
- Fully Compliant to EN54-24

The SPCB-30W-65-EN54 is a 30W 100V ceiling loudspeaker, which has a 6.5" (165mm) full-range chassis providing excellent sound quality with speech and background music, and which is compliant to EN54-24. The bass reflex feature makes this loudspeaker ideal for installations that require high sound quality. The loudspeaker is fitted with a 100V transformer which has four power adjustment tappings of 30W, 15W, 7.5W, and 3.75W. Low impedance (8Ω) option is also available.

The SPCB-30W-65-EN54 has a high-density, impact-resistant ABS plastic housing which provides good long-term stability. The loudspeaker is fully enclosed and is ingress protection rated to IP21C. As standard the loudspeaker is coloured to match RAL9016.

A screw mounting system is provided for ceiling mounting. The 100V loudspeaker line cabling is connected by a 4-pin screw terminal connector, which plugs into a socket on the loudspeaker (maximum cable cross section is 4.9mm²). For additional reliability, a thermal fuse is fitted, and the loudspeaker chassis is damp-resistant.

Please note that although very thin ceilings can be used as a mounting surface, it should be ensured that the ceiling thickness and strength are appropriate to the weight (2.27kg) of the loudspeaker, and to the thickness and weight of the 100V line loudspeaker cable.

This loudspeaker is optionally available with a DC blocking capacitor fitted, in order to provide compatibility with DC loudspeaker line monitoring systems. The part number for this DC monitoring compatible version is SPCB-30W-65-EN54-DC.

Enhanced Acoustic Simulator for Engineers (EASE) data for this loudspeaker is available on request.

	<p>Compliant to EN54-24:2008 Measurements according to DIN IEC 268-5 RoHS compliant (2011/65/EU)</p>	<p>Loudspeaker for voice alarm systems for fire detection and fire alarm systems for buildings. Type A Rated voice voltage: 100V Rated voice/noise power: 30W</p>

Installation

1. Check that the ceiling thickness is between 2mm and 45mm, with a thickness and strength which is appropriate to the weight (2.27kg) of the loudspeaker.
2. The 100V audio power cable should have a maximum cable cross section of 4.9mm², or a maximum cable cross section of 2 x 4.9mm² when daisy-chain wiring is used.
3. Make a ceiling cut-out of 210mm.
4. Open the metal terminal cover plate on the rear of the speaker.
5. Put the connection cable through the grommet of the metal plate.
6. Choose a power tapping and connect the connection cable to the matching terminal on the 4-pin connector, and COM.
7. Plug the connector into the socket on the rear of the loudspeaker.
8. Fix the metal terminal cover plate onto the rear of the speaker.
9. Remove the speaker grille by using the supplied mounting hook.
10. Insert the loudspeaker into the ceiling until the rim touches.
11. Turn the screws on the mounting tabs until the loudspeaker is securely fitted to the ceiling.
12. Fit the speaker grille to the front of the loudspeaker.

Service and Warranty

This product carries a full warranty. For full details of warranty and service agreements, please contact the organisation which supplied the product to you.

Exclusions

The warranty does NOT cover:

1. Customer misuse, including incorrect installation.
2. Abnormal environmental operating conditions.
3. Damage incurred by accident, fire, lightning or other hazard.
4. Modification to the unit or inexpert / attempted repair.
5. Any other damage (other than manufacturing defects).
6. Improper packing or transit / courier damage.
7. Over voltage audio power supply used.
8. No fault found.

Application Solutions (Safety and Security) Limited shall not be liable for any indirect, special or consequential loss or damage (including without limitation any loss of profits) arising from the use of this product or for any breach of this warranty.

In the interest of continual product development, Application Solutions (Safety and Security) Limited reserves the right to make changes to product specification without notice or liability.
