Zenitel & Triton Integration

Proactive Safety Beyond the Camera

Smarter Detection.

Faster Response.

Safer Spaces.

Making intelligent security solutions together

Integrating audio brings proactivity and interactivity to your safety and security operations, enabling teams to make faster, more informed decisions, collaborate in real time, and maintain seamless operational continuity across the entire communication system.

By combining Zenitel's intelligent audio solutions with Triton's advanced sensor technology, your security infrastructure gains extended reach and responsiveness—enabling teams to communicate clearly, act faster, and make smarter decisions when every second counts.

Zenitel and Triton work together to identity security and safety violations and respond fast, even in places cameras can't go. Triton finds issues like vaping, fights, and loitering, while Zenitel Connect Pro turns those alerts into clear audio messages or intercom calls. Together, they keep people safe and secure.

Enhance Your Safety Workflow With Intelligent Detection and Response

The Zenitel and Triton integration enhances safety by extending protection into areas where cameras can't reach - such as bathrooms, stairways, and other privacy-sensitive spaces.

Triton Sensors close these gaps — detecting vaping, fights, loitering, and more - without capturing personal data. Through the **Zenitel Connect Pro** platform, these alerts are transformed into instant, clear communication via intercom and speaker systems, enabling staff to respond quickly and effectively.

By combining intelligent detection with real-time communication, Zenitel and Triton empower proactive intervention and create safer environments for everyone.

TRITON INTEGRATION

A Safety Workflow in Real Time. From Detection to Action.

1 Detect

Triton Sensor detect critical incidents like vaping, aggression, loitering, and air quality issues. 2 Trigger

Zenitel Connect Pro

Zenitel Connect Pro receives events from Triton. These events can be used to trigger audio events such as live messages, pre-recorded warnings. 3 Actions

Easily broadcast live or pre-recorded messages to selected groups of IP speakers or intercoms.

4 Notification

To One

To Group

To All

Deliver the right message to the right place — fast. Choose from target specific zones or areas customized to your site's layout and needs.

TRITON INTEGRATION

Key Integration Benefits

Instant Alerts

Triton Sensors detect issues in real time, while Zenitel ensures your team is alerted immediately.

No blind Spots

Bathrooms, hallways, and patient rooms often go unmonitored -Triton fills those gaps, and Zenitel enables fast, direct communication the moment something happens.

Reach Everyone Fast

Broadcast live or recorded announcements through Zenitel devices so critical information reaches everyone instantly.

Easy to Expand

Add sensors as your safety needs evolve — quickly, easily, and without high costs.

Safer Spaces

Detect issues early to keep schools, hospitals, and workplaces protected at all times.

INTEGRATION

Applications

ENTERPRISE

Detect glass breaks, or loitering. Zenitel pushes lockdown instructions and supports staff during emergencies.

Edition and the second of the

EDUCATION

Triton spots vaping, loitering, fights, or cries for help in bathrooms and halls.

Zenitel alerts staff or calls for lockdowns right away.

HEALTHCARE

Sensors track air quality and pick up distress like shouting or aggression. Alerts go straight to nurse stations or security.

TRANSPORTATION

Find crowding, noise, or aggression in busy areas. Zenitel broadcasts safety or evacuation messages instantly.

Zenitel Connect Pro

- Unified Critical Communication

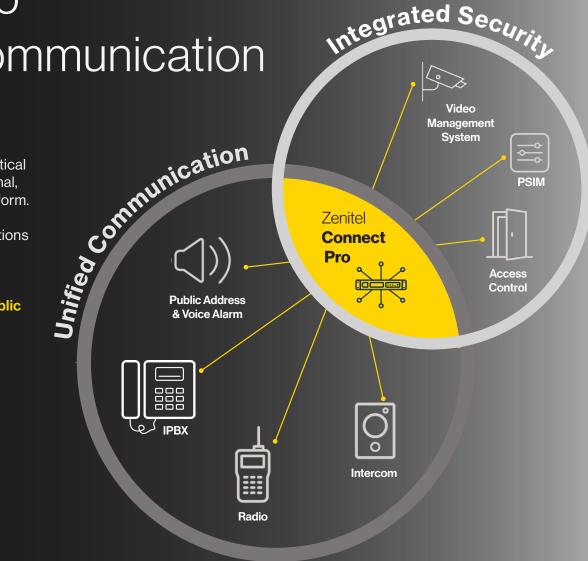

Zenitel Connect Pro is a next-generation communication platform that combines core functionalities with seamless 3rd-party integrations, setting a new standard for unified critical communication. It brings together safety, security, operational, and infotainment communication needs - all under one platform.

This platform represents a shift in how people and organizations communicate, moving from traditional, siloed systems to a collaborative, connected approach.

Zenitel Connect Pro integrates Intercoms, IP speakers, Public Address, and Voice Alarm Systems into a single, cohesive platform, making communication effortless and responsive.

Built on open interface standards, Zenitel Connect Pro empowers security system integrators to weave audio seamlessly into the broader security ecosystem

- transforming security from reactive to proactive and interactive.

Why Triton?

Most unsafe events — about 80% — happen where cameras can't go. Triton Sensors cover these blind spots by detecting fights, drug use, loitering, and more.

Triton gives you **90% of a camera's awareness without collecting personal information**. By breaking down barriers to monitoring, Triton helps staff act faster, stop problems early, and keep people safe.
