# Zenitel integrates with Avigilon

**Increase situational awareness, decision making, and response time with the integration between Zenitel and the Avigilon Control Center™**

The combination of Zenitel's crystal-clear audio and video capabilities with Avigilon's advanced video management software provides security teams with:

- Enhanced situational awareness with simultaneous live audio and video streams, managed directly from the Avigilon Control Center

- Ability to associate multiple video cameras with each intercom device during a conversation, for a complete picture and recording of the caller and their surroundings

- Superior analytics and automated response capabilities to help ensure critical events get noticed and responded to quickly

- Easy configuration and auto-discovery through

# The benefits of integrated communications

Providing security teams with the right information at the right time is key to effective decision making. The Zenitel/Avigilon Control Center integration adds audio and voice communication solutions from Zenitel to a video management workflow. The result is the ability to streamline operations and mitigate risks with enhanced security and safety for the facility.

**Enhanced Situational Awareness**
Hear audio and view video from Zenitel devices.

**Supervise and Monitor**
See and verify status of each intercom device

**Improved Accountability**
Record and replay video streams, and log events

**Verify Visitor Identity**
Provide dual identity verification through both visual and audio communication

# Easy Integration
## of high-quality audio and video with ONVIF

Thanks to ONVIF compatible software it is easier to integrate and map Zenitel solutions with other security systems, which gives your security team more tools to manage not just video but also audio under the same control interface.

All Zenitel's TCIV+ stations are ONVIF conformant. All audio-only devices from our Turbine range of stations, kits, and IP-speakers are ONVIF compatible.

**Want to learn more about how ONVIF Compatible solutions from Zenitel can help you?**

All you need to do is to visit Zenitel Academy and spend 25 minutes with a Zenitel Product Manager as they walk you through the facts, how to set it up, as well as use cases for the various features.

You can create an account if you already don´t have one by visiting zenitel.com

## Zenitel's ICX-AlphaCom Communication Platform

**IC-EDGE**

This serverless communication system delivers seamless integration, unrivaled audio quality and ease of use, right out of the box.

**ICX-AlphaCom**

Zenitel's scalable, server-based platform enables advanced communication management, integrated with security applications.

**avigilon**™

**The following features\* are available once Zenitel devices are connected to the Avigilon Control Center via ONVIF, regardless if they are in SIP / EDGE/ AlphaCom mode.**

### Discovery and configuration
- ✓ Auto-discovery of Zenitel audio and video devices
- ✓ Registration of Zenitel audio and video devices in system tree, log server, recorder
- ✓ Zenitel audio and video devices in Map view
- ✓ Zenitel device components - camera, microphone, speaker, IO's - listed in system tree and Maps view
- ✓ Associate external cameras with intercom stations

### Video and Audio features
- ✓ Video live stream, manual/event-based recording, playback
- ✓ Audio live stream/listen-in
- ✓ Issue pre-recorded audio messages from Control Center to Zenitel devices

### Other Features
- ✓ Door release/output control in Control Center
- ✓ Customizable event triggers in Control Center based on device call events, device status change and IO triggering
- ✓ Reports and log file for station events (calls/call button push, input triggered, output triggered, etc.)
- ✓ Intercom events notification in the Alarms tab

\*) Requires Avigilon's "Camera Channel License" to benefit from the above feature set.

> **Adding the licensed Zenitel ICX-AlphaCom interface to Avigilon Control Center enables you to connect the event handler in the ICX-AlphaCom with Control Center - providing you the opportunity to enhance your security solution with hundreds of alarm triggers.**

## Why **Zenitel?**

Zenitel is well positioned to drive the future of intelligent critical-communication solutions. Through our portfolio of IP products & solutions, with built-in intelligence and a focus on cybersecurity, we provide organizations with superior, scalable security and flexibility. Zenitel is the proven, preferred choice for environments requiring crystal-clear audio to ensure the protection of human life, property, assets and the management of critical activities. With interoperability at all levels, we seamlessly integrate with access control, video management and security platforms.
