IC-EDGE

The Zenitel IC-EDGE is a next-generation, intelligent communication system that delivers unrivaled, out-of-the-box sound quality, interoperability, security, and ease of use. Zenitel's range of security communication solutions can be customized to meet specific requirements and needs.

ICX-ALPHACOM

The ICX-AlphaCom Platform is an intelligent communication platform that provides management and security services, and allows for seamless integration into the cloud and other applications. ICX-AlphaCom offers:

- Integrated Intelligent Communication Management & Security

- Scalability & Robustness

- Interoperability

SIP

Zenitel offers products specifically for integration in a preexisting or new SIP system. In addition we've made the inside of our products available as KITs for you to customize for any need. This enables anyone to customize and design tailor-made solutions. Quality combined with flexibility are only two of the many reasons why Zenitel products are found all over the world. By presenting you with SIP products and solutions, we hope to inspire you to discover the endless possibilities of SIP and identify how Zenitel SIP products can complement your communications system.

EMERGENCY STANCHIONS AND WALL UNITS

EMERGENCY COMMUNICATION – MASS NOTIFICATION – AREAS OF RESCUE – AUDIO PAGING

zenitel
because communication is critical

zenitel

CRITICAL COMMUNICATION IN ANY ENVIRONMENT: The ICX-AlphaCom connects people, devices, and systems at unprecedented levels of manageability, scalability, robustness, and interoperability. ICX-AlphaCom will provide your site with all your communication needs, as it is easy to extend in functionality and system size, and is designed to be future-enabled.

More information about setup can be found on the back of this brochure and on www.zenitel.com

INTELLIGENT COMMUNICATION: With IC-EDGE, we introduce a paradigm shift in the way intelligent communication systems are used, deployed, and integrated into safety and security systems, as well as cloud networks. The design of IC-EDGE was guided by four criteria: intelligibility (hear, be heard and be understood), interoperability (seamless integration into core solutions), scability (able to meet future needs), and cybersecurity (defense from outside threats and attacks).

For more information on all emergency stanchions, wall units and turbine adapter face plates, please request the individual data sheets.

APPLICATIONS

- Corporate Buildings
- University/College Campuses
- Mass Transit
- Airports
- Hospitals/Clinics
- Park/Recreational Areas

INSTALLATION LOCATIONS

- Parking Garages/Lots
- Campus/Corporate Walkways
- Area of Rescue
- Stairwells
- Automatic Entryways
- Off-site or Remote Areas

Emergency Stanchion 1600 Deluxe Tower 2809016000

Emergency Stanchion Mass Notification 1600 Tower with Mass Notification Option 2809016002

Emergency Stanchion 1600-04 Tower with optional 4 CCTV Mount 2809016004

Emergency Stanchion Mass Notification 1600-04 Tower with optional 4 CCTV Mount & Mass Notification 2809016006

Emergency Eco Stanchion 1608 Eco Tower 2809016080

Emergency Stanchion 1601 Econo Tower 2809016010

Emergency Eco Stanchion 1604 72" Tower 2809016040
